#### 20. FOREIGN CURRENCY POSITION (cont'd)

#### Foreign currency sensivity

The Group is exposed to foreign exchange risk arising from various currency exposures, primarily with respect to US Dollars and Euro.

The following table details the Group's sensitivity to a 5% increase and decrease in foreign currency rates. 5% is the sensitivity rate used when reporting foreign currency risk internally to key management personnel and represents management's assessment of the possible change in foreign exchange rates. The sensitivity analysis includes only outstanding foreign currency denominated items and adjusts their translation at the six month interim period end for a 5% change in foreign currency rates. This sensitivity analysis excludes the foreign currency denominated items presented on the balance sheet of the Group companies whose functional currency is other than TL. A positive number indicates an increase in profit or loss.
